

Dear Customer,

Coopex[®] Wettable Powder 25g sachet / K-Othrine[®] WG 250 - 3g sachet

Bayer is very sorry to have to tell you that Coopex[®] Wettable Powder is to be withdrawn from the market and cannot be used after 6th October 2006. No other Bayer product is affected, only Coopex Wettable Powder.

We realise that this may be very inconvenient to you and Bayer wishes to sincerely apologise for any problems that this may cause you. We value your loyalty and commitment and want to make amends for the inconvenience caused to you. To illustrate this and as a gesture of goodwill, Bayer will replace your Coopex[®] WP stock with K-Othrine[®] WG 250 and will in fact **double the quantity**.

K-Othrine[®] WG 250 has exactly the same approvals as Coopex[®] WP and instead of using a 25g sachet you will now use a 3g sachet of K-Othrine[®] WG 250. This means that the sachet will be smaller, more convenient and there will be less visible deposit.

Bayer is also very happy to tell you that the Health and Safety Executive has approved Bayer's new usage and dosage recommendations for K-Othrine[®] WG 250 and that the label has been improved. The new approval for K-Othrine[®] WG 250 applies to the following situations:

For Use In

Domestic Situations:

Private housing, it can be sprayed on carpets, wallpaper, furniture, bed frames and mattresses (but not clothing, sheets, pillow cases or cots).

Public Buildings:

Continuously occupied areas (as a band/spot or crack and crevice treatment only), hospitals, hotels, public baths, municipal buildings, churches, halls, community centres, cinemas, etc.

**Food Handling:**

Processing: food manufacture, kitchens, slaughterhouses etc.

Storage: food retailers, warehouses, etc.

Preparation: restaurants, commercial kitchens, etc.

Aircraft :

Aircraft galleys, cabins etc.

On Board Ship :

Accommodation and Food Preparation areas.

New Approved Dosage Rate:

1 sachet to 5 litres of water (100m²) (Clean up treatment of isolated infestations)

2 sachets to 5 litres of water (100m²) (Chronic infestations and long residual control)

The dilution rate you use will depend on the insect and size of infestation.

If you have any stock of Coopex[®] Wettable Powder, please contact your distributor or supplier and they will replace it with double the quantity of K-Othrine[®] WG 250.

If you need any further advice please don't hesitate to contact me. May I also take this opportunity to thank you for your patience with this situation and also for your continued support?

Yours sincerely,

A handwritten signature in black ink that reads "Tony Hudson". The signature is written in a cursive style with a long horizontal stroke at the end.
