

## PLEASE NOTE THIS SURVEY ONLY RELATES TO RODENT COMPLAINTS AND INITIAL TREATMENTS

Please give annual totals as per Calendar Year or Financial Year

Brown Rat ( <i>Rattus norvegicus</i> )	2006	2007
Total number of complaints or requests for treatments where a treatment was carried out		

House Mouse ( <i>Mus domesticus</i> )	2006	2007
Total number of complaints or requests for treatments where a treatment was carried out		

### **BROWN RAT ACTIVITY DURING THE SUMMER MONTHS**

April 1<sup>st</sup> – September 30<sup>th</sup> 2006 then April 1<sup>st</sup> – September 30<sup>th</sup> 2007  
(NOTE: The summer months ONLY)

Brown Rat ( <i>Rattus norvegicus</i> )	2006	2007
Total number of complaints or requests for treatments where a treatment was carried out		

Whilst last year's Survey Report 2007 announced an overall reduction in both rat and mouse numbers we firmly believe that from anecdotal evidence already to hand that the late summer and autumn of 2007 saw a marked rise in requests for treatments.  
This Survey is therefore most important.

In previous Reports many useful and professional comments were added by local authority officers along with their statistics. May we again seek everyone's views (both good and bad) for this year's report?
